The StriveTogether Cradle to Career Network is a national network of community partnerships working to improve education success for every child by bringing together cross-sector partners around a common vision.

StriveTogether supports these communities with effective resources and a nationally-recognized collective impact approach focused on aligning existing resources and using data to determine what works best for kids. StriveTogether helps communities develop shared outcomes and success metrics, identifying best practices and solutions to address local disparities and improve outcomes for all children.

STRIVETOGETHER’S ROADMAP TO STUDENT SUCCESS

Improving Education Outcomes, From Cradle To Career

Education is a lifelong experience that begins well before a child ever sets foot in a classroom and continues long past a cap-and-gown commencement. These academic outcomes are supported by research as key contributors to the achievement of cradle to career success, and are regularly reported by each community partnership in the Network to ensure accountability and alignment of community resources.

QUALITY COLLECTIVE IMPACT APPROACH

Lessons learned from community partnerships have shaped a data-driven approach to collective impact that is building momentum and success stories across the country. Connected by the work on the ground, StriveTogether Cradle to Career Network members are committed to sharing knowledge, building upon what works and driving action to improve key outcomes along every child’s path to education success.

www.strivetogther.org
The Theory of Action offers a quality collective impact approach to support communities as they develop and sustain cradle-to-career civic infrastructure. Each community is committed to four key principles across their work:

- Engage the community
- Focus on eliminating locally defined disparities
- Develop a culture of continuous improvement
- Leverage existing assets

With these principles in mind, community partnerships are able to chart the path through the Theory of Action from the early stages of formation through systems change and ultimately proof point. Partnerships that have embraced this quality approach are building civic infrastructure to change systems for sustainable impact on student outcomes.
