BUILDING  **IMPACT**

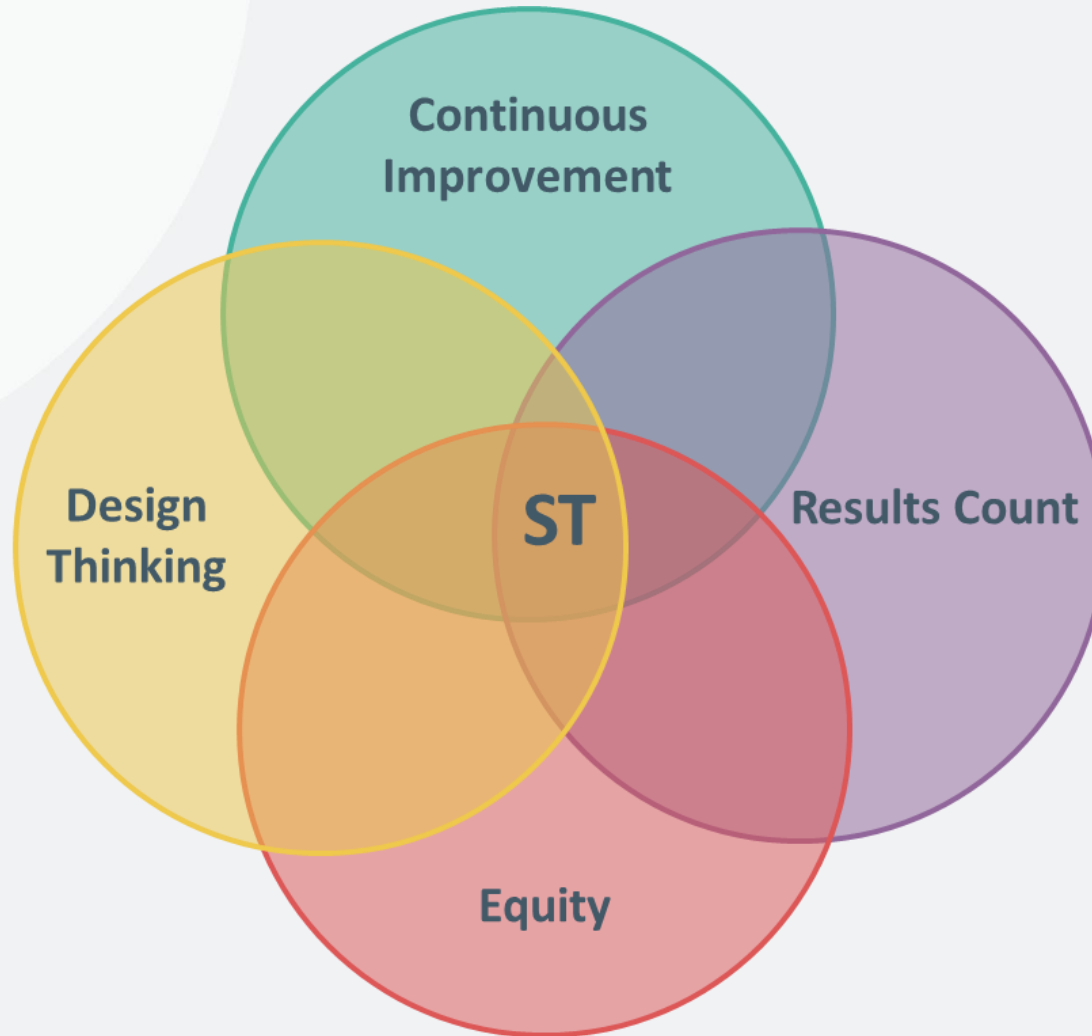

StriveTogether's Collaborative Improvement™ Methodology

Collaborative Improvement™ Methodology in Collective Impact

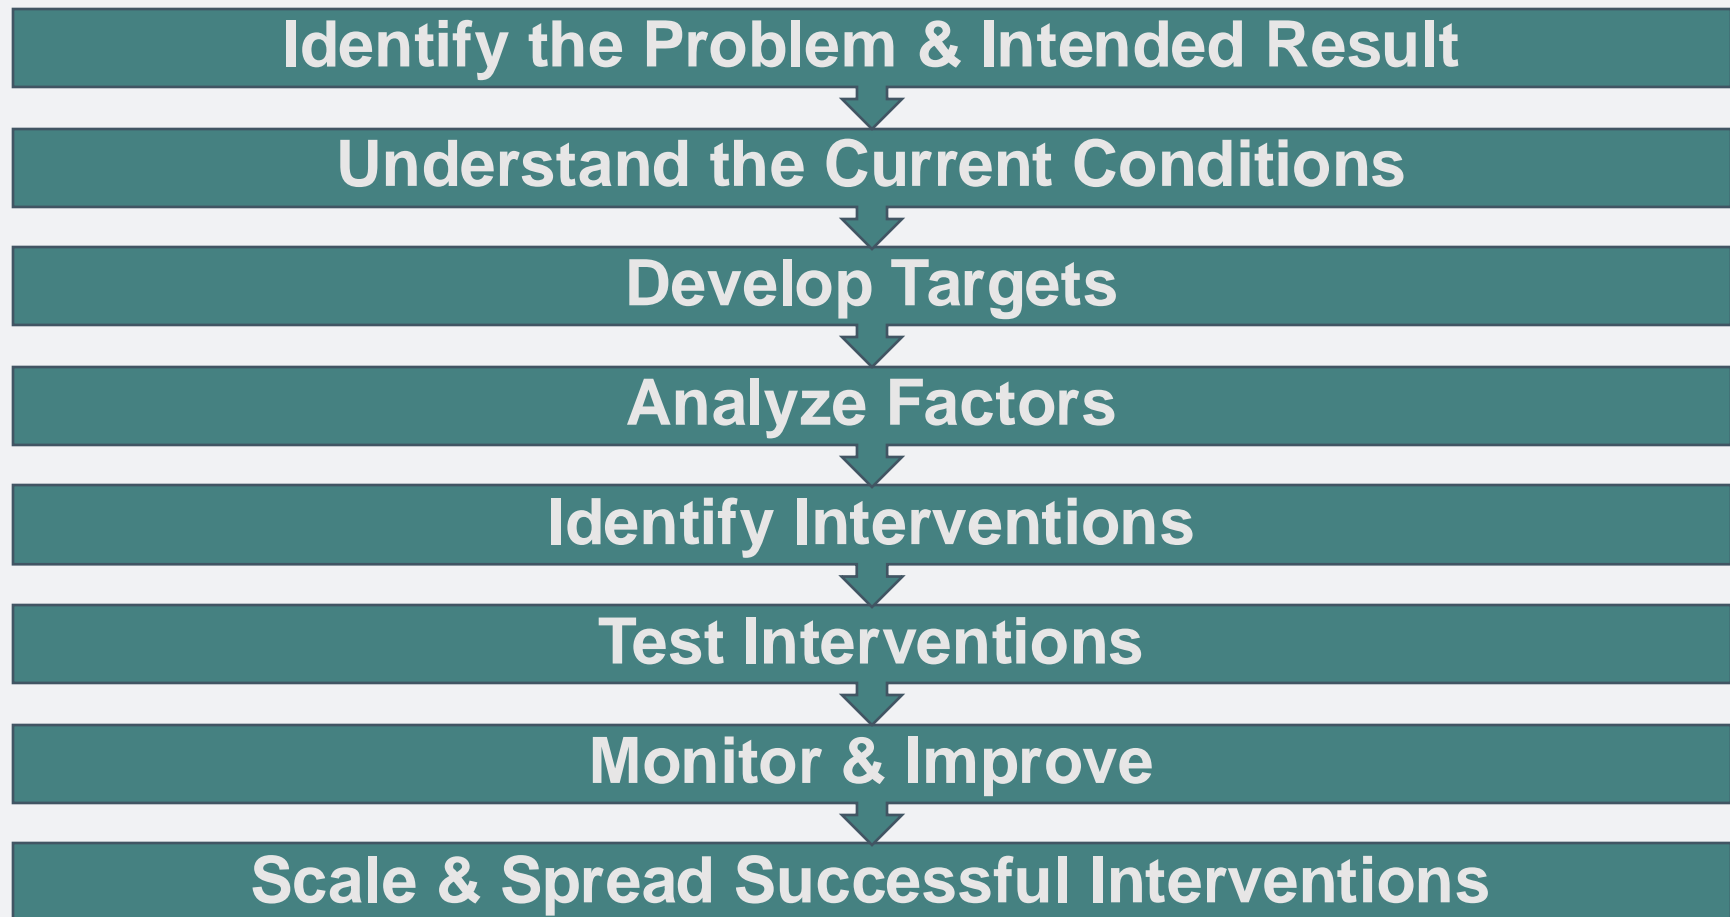

- **INDIVIDUALLY**
Individual school teacher works with children to set goals and test interventions to improve learning in the classroom
- **ORGANIZATIONALLY**
Organizations (e.g. school districts or direct service providers) practice continuous improvement across their institution to improve services and supports for children and families
- **COLLABORATIVELY**
Partners (e.g. Leadership Table or Collaborative Action Networks) collectively track the impact of interventions against shared outcomes to improve services and supports for children and families

Insight Sheets (Example 1)

Title: Falling off

Insight: Students miss more school in each consecutive 6-week period.

Actions: Increase targeted attendance efforts in mid-year, continue until year-end. "Back to school" campaign is not enough.

Source: Camden Attendance Data

Insight Sheets (Example 2)

Title: Creepy Crawlers

Insight: Student doesn't feel secure walking to bus stop due to "creepy" people/outside threats.

Actions: Could we have volunteers at bus stops (akin to crossing guards) or more bus stops to reduce the distance students have to walk?

Source: Interview with student at Camden High School

Insight Sheet Tips

- One insight per sheet
- Quality over quantity
- Make us think “**A-ha**” or contain a “**so what**”?
- Title really matters; write it last

Gallery Walk

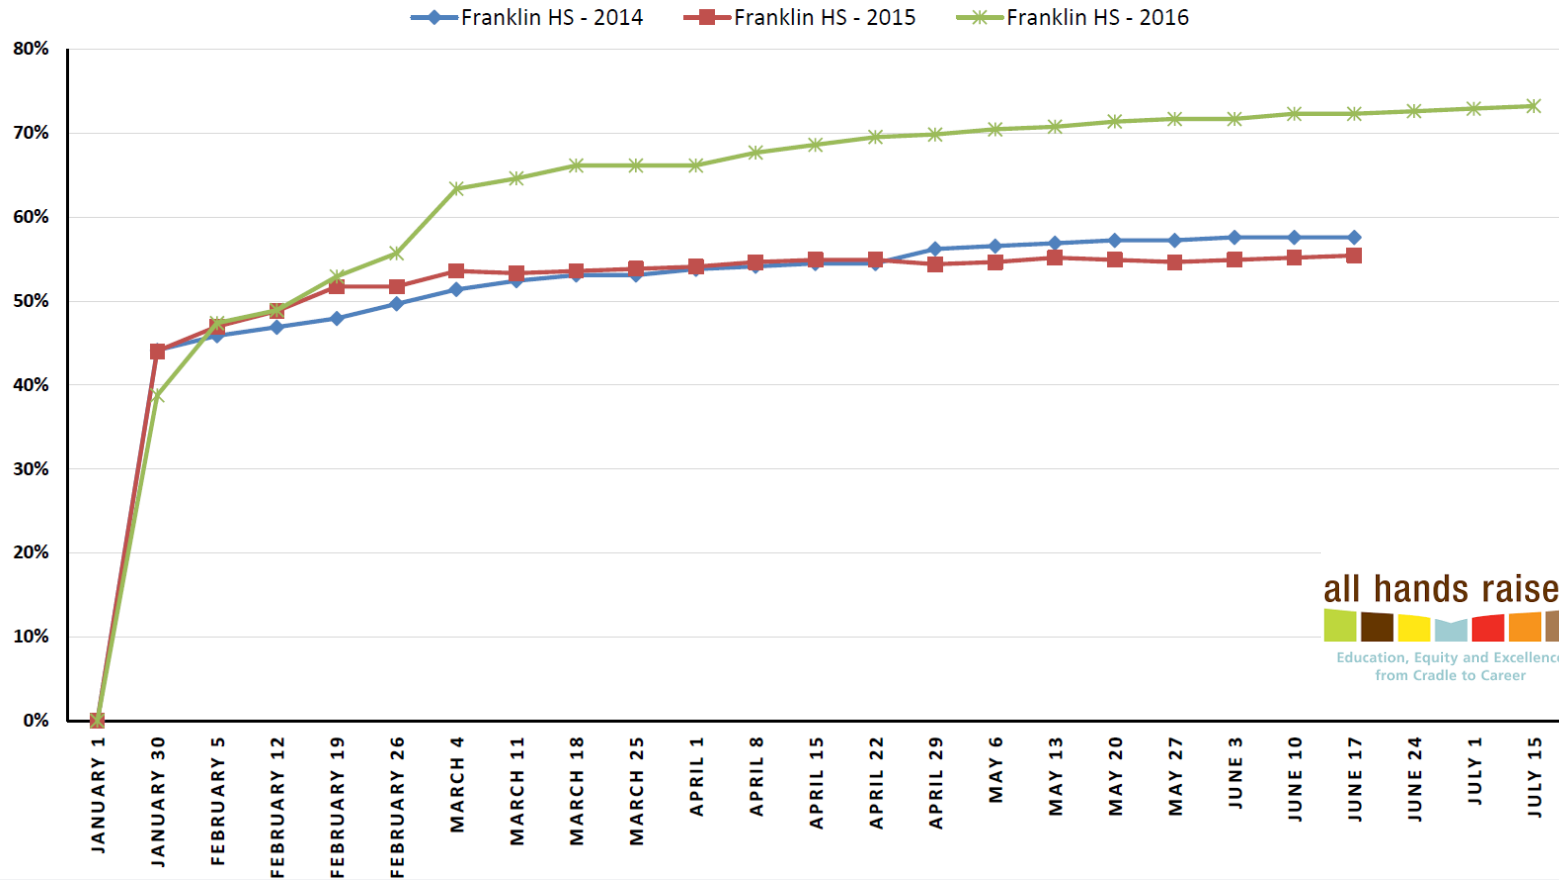

- Partner up with someone you don't know.
- Walk through the A3s, considering:
 - What insights might you glean if you were a new member of that improvement team?
 - How did the tools the communities used guide their approach to improvement?
 - What tools might be applicable in your community?
- Capture your learnings on your “insight sheet.”

Key Learnings: Be Flexible

Key Learnings: Data, Data, Data.

StriveTogether believes...

- In the rigorous use of data – used for improvement, not for judgment.
- That failure is where learning happens.
- That this work can only be done with – not to – those we intend to serve.
- That it takes a village.
- That there is no one-size-fits-all approach.
- That solving complex problems requires creativity and innovation.
- That you just have to start.
- In starting small.
- In closing disparity gaps.
- In improving outcomes for every child, cradle to career.
